Hypo vs Hyperglycemia

Adult Health | Endocrine

REMEMBER IT AS

Cold and clammy, need some candy. Hot and dry, sugar high.

- **Hypoglycemia (cold and clammy)**
  Shaky, sweaty, pale, irritable, confused, tachycardic.
- **Hyperglycemia (hot and dry)**
  Polyuria, polydipsia, polyphagia, dry skin, fruity breath in DKA.
- **Rule of 15 for a conscious client**
  Give 15 g fast-acting carbohydrate, recheck in 15 minutes.

NURSE TIP

When in doubt and the client is symptomatic, treat as low glucose first.
