Cardiac Drug Suffixes

Pharmacology | Cardiovascular

REMEMBER IT AS

Know the ending, know the class

- **-olol: beta blockers**
  Check apical pulse and BP; hold for bradycardia.
- **-pril: ACE inhibitors**
  Watch for dry cough, angioedema, and high potassium.
- **-sartan: ARBs**
  Like ACE inhibitors but without the cough.
- **-dipine: calcium channel blockers**
  Watch for hypotension and peripheral edema.

NURSE TIP

Hold antihypertensives and report when the client is hypotensive.
